

**What Is Claimed Is:**

1           1. An air mattress, including:  
2           a mattress pad;  
3           a back support to raise a part of the mattress pad, the  
4           back support having a V-shaped cross section.

1           2. An air mattress, including:  
2           a mattress pad;  
3           a back support to raise a part of the mattress pad, the  
4           back support having a flexible chamber and a holding element  
5           binding the flexible chamber.

1           3. An air mattress as claimed in claim 2, wherein the  
2           back support further has a frame firmly fixed to the flexible  
3           chamber and rotatably connected to the mattress pad for  
4           collapsing the flexible chamber.

1           4. An air mattress as claimed in claim 3, wherein the  
2           back support further has at least one slider mounted on the  
3           frame, via which the frame slides on the ground.

1           5. An air mattress as claimed in claim 2, wherein the  
2           back support further has at least two frames hinged together,  
3           with the flexible chamber sandwiched therebetween.
